

Symphony 3.2

Integrated Solutions
for Library and
Consortium Management

Conduct your library's future

- Proven, scalable and extensible architecture that easily accommodates new technologies and can evolve as necessary.
- Software-as-a-service options to provide hosting, upgrades and back up.
- Basic and advanced capabilities for Circulation, Cataloguing, Serials, Acquisitions, Outreach, Materials Booking, Reserves, Accountability and more.
- Fully documented application programming interfaces (APIs) that enable library staff to meet unique needs.
